

Agent Quality Scorecard

Carriers are wiring comp to these four numbers, from the top of the hierarchy down. Every one of them is fully in your control at the point of sale. Know yours, protect yours.

The one-line rule: sell for fit, verify before you submit, and stay in touch for 90 days. Do that and all four metrics take care of themselves. These are the same numbers that make your renewals compound.

01 CTM Complaint Rate

BAR: BEAT ~0.55 PER 1,000

WHAT IT IS

Complaints a client files through 1-800-MEDICARE. They land in CMS's Complaint Tracking Module and get traced back to the writing agent. Most are expectation gaps, not misconduct.

PROTECT IT

- Put MOOP, copays, referral rules, and network limits in writing at the sale.
- Tell every client: "call me first, about anything."
- Return client calls same day during AEP. An unreturned call becomes a CTM.

02 HRA Completion Rate

BAR: EVERY ELIGIBLE APP

WHAT IT IS

The health risk assessment at point of sale. Carriers measure the rate at which your applications include a completed HRA. It feeds their care management, and now your scorecard.

PROTECT IT

- Do it during the appointment, every time, even when the payment is small.
- Frame it for the client: "this makes sure the plan knows your health needs on day one."
- Never fabricate answers. A bad HRA is worse than none.

03 Rapid Disenrollment Rate

BAR: NEAR ZERO

WHAT IT IS

A member who leaves within the first 3 months. It is already a 100% commission chargeback by regulation (42 CFR 422.2274). Carriers now watch it at the book level too.

PROTECT IT

- Verify every doctor and every drug in the platform before you submit, not after.
- Right-fit beats quick-close: a wrong plan is unpaid work plus a scorecard hit.
- Week-one onboarding call: ID card arrived, PCP correct, first fill went through.

04 Provider Selection on the App

BAR: A PCP ON EVERY APP

WHAT IT IS

Whether you attach a primary care provider to the enrollment. Platforms like SunFire badge in-network and high-performing providers during quoting; carriers want members connected to care from day one.

PROTECT IT

- Run the provider search with the client in front of you; confirm in-network status.
- Pick the badged / preferred provider when the client has no preference.
- No PCP on the app means a bad first claim and a member who shops next AEP.
