

2027 Client Triage Checklist

Plan exits will displace 600,000+ members and most standalone drug plan premiums rise January 1. Your clients find out by letter in late September. This checklist makes sure they hear it from you first.

Why September decides your AEP: exit letters and ANOCs land in the same two-week window before October 15. In the last big churn cycle, carriers recaptured about 40% of their own displaced members. The other 60% went to whoever called first. Be the first call, not the cleanup crew.

NOW, BEFORE THE LANDSCAPE DROPS AUGUST · 1 TO 2 HOURS

- ☐ **Pull your full book by county and carrier.** Service area reductions are county-by-county surgery. You cannot triage what you cannot sort.
- ☐ **Flag every PDP-only client, especially \$0-premium drug plans.** These clients see the biggest premium jump feeling, even when the dollars are small.
- ☐ **Flag clients on plans rated 3.5 stars or below.** Low-rated plans are the most likely to be exited or trimmed.
- ☐ **Confirm you can be paid where your book lives.** Check your certifications and contracts against the carriers you will need for replacements.

LATE SEPTEMBER, WHEN THE LANDSCAPE AND ANOCs DROP SEPT 25 TO OCT 14

- ☐ **Cross-reference exit lists against your county map** the day carrier landscape files publish. Build your displaced-client list first.
- ☐ **Call displaced clients before their letter registers.** Priority one: anyone losing a plan entirely.
- ☐ **Call PDP clients with premium jumps.** A 30-second heads-up in September buys you the December review.
- ☐ **Book AEP appointments on those calls** for October 15 onward. Do not review plans early; do lock the calendar.
- ☐ **Sort the rest of the book: keep, review, or watch.** A stable client on a stable plan gets a check-in, not a shakeup.
- ☐ **Prep replacement options per county** before appointments, so you walk in with two answers, not a search bar.

ALL SEASON, EVERY SAVE OCT 15 TO DEC 7

- ☐ **Log every client you help through an exit, a premium jump, or a non-commissionable plan.** Count them. That log is your renewal defense, your referral script, and the story that lands with local press and legislators.
- ☐ **Verify doctors and drugs before every replacement enrollment.** A displaced client rapid-disenrolling from your replacement is disruption squared. Attach a PCP to every application.

THE SEPTEMBER HEADS-UP CALL, IN THREE SENTENCES

"You'll get a letter from your plan in the next couple of weeks, and I wanted you to hear it from me first: your plan is changing for next year. Nothing happens today, and you don't need to do anything yet. I've already got time held for us in October to go through your options together."
