

# Medicare Supplement, made simple

How Plan G and Plan N work alongside Original Medicare

## HOW A MEDIGAP PLAN WORKS WITH ORIGINAL MEDICARE

*Heads up: a Medigap plan does not include drug coverage. Pair it with a stand-alone Part D plan.*

## WHO PAYS A \$1,000 COVERED DOCTOR BILL?

- With Plan G:** you pay \$0 (after the yearly Part B deductible).
- With Plan N:** a small copay (up to \$20); plan covers the rest.

## PLAN G VS. PLAN N, SIDE BY SIDE

|                              | PLAN G       | PLAN N                |
|------------------------------|--------------|-----------------------|
| Monthly premium              | Higher       | Lower                 |
| Part A hospital deductible   | ✓            | ✓                     |
| Part B coinsurance (the 20%) | Covered 100% | Covered, minus copays |
| Doctor office visit copay    | None         | Up to \$20            |
| Emergency room copay         | None         | Up to \$50*           |
| Part B excess charges        | ✓            | ✗                     |
| Annual Part B deductible     | You pay      | You pay               |
| Foreign travel emergency     | ✓            | ✓                     |
| See any doctor nationwide    | ✓            | ✓                     |
| Prescription drugs           | Add Part D   | Add Part D            |

*\*Plan N ER copay is waived if you are admitted. Neither plan covers the annual Part B deductible.*

## WHICH ONE FITS YOUR CLIENT?

- Plan G**  
 Wants the most complete coverage and predictable \$0 bills after the deductible, and does not mind a higher premium.
- Plan N**  
 Wants a lower premium and is fine paying small copays at visits. A great value for healthy, budget-minded clients.

### THE BOTTOM LINE

Both let your client see any doctor nationwide with the same standardized benefits. The real decision is a higher premium now with Plan G, or a lower premium with small copays as you go with Plan N.
