

Medicare Advantage, made simple

How a Part C plan works together with Original Medicare

Medicare Advantage (Part C) is an all-in-one plan from a private insurer. When it includes drug coverage, it is called an MAPD.

HOW MEDICARE ADVANTAGE WORKS

WORDS TO KNOW

Premium

The fixed amount you pay each month for the plan. Often \$0, plus your Part B premium.

Out-of-pocket max

The most you can pay for covered medical care in a year.

Copay

A small flat fee you pay when you get care, like \$10 to see your doctor.

Network

The doctors, hospitals, and pharmacies your plan works with.

YOUR MEDICAL COSTS ARE CAPPED EACH YEAR

OUT-OF-POCKET MAX

Once you hit that yearly maximum, the plan pays 100% of covered medical care for the rest of the year.

TWO COMMON PLAN TYPES

HMO

lowest cost, local

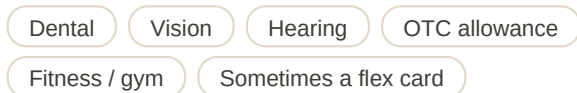

Use the plan's network and pick a primary doctor. Referrals are often needed. Emergencies are covered anywhere.

PPO

more flexibility

See in- and out-of-network providers without referrals. You pay less in-network, more out-of-network.

EXTRAS OFTEN INCLUDED

RULES TO KNOW

- Plan has a service area; you must live in it.
- Some services need prior approval.
- HMOs may require referrals to specialists.
- Change plans each year during AEP (Oct 15–Dec 7).

THE BOTTOM LINE

One plan brings your hospital, medical, and usually drug coverage together with extras like dental and vision, in exchange for using a network, and a yearly out-of-pocket maximum caps what your client can spend.
